

Remote management and monitoring

More foresight, less surprises

- Interactive troubleshooting and diagnostics
- Presentive remote maintenance and programming options
- Maintenance requirements

Always accurate information

- Real-time machine monitoring offers actual information related to the operation of machinery and equipment regardless of where the machinery and equipment is located or where the monitoring takes place.

Solutions for
 Mobile machines

pmchydraulics

Mobile machines - hydraulics play a key role

Hydraulics are used in most construction and mobile machines.

In close co-operation with our customers, we develop and engineer reliable and functional systems, for which we take full responsibility.

PMC Hydraulics supplies hydraulics systems and components to many of the world's leading manufacturers of mining, construction, forestry and agricultural machinery, earth movers, trucks, cranes and utility vehicles as well as container handling equipment, mobile cranes, lifting platforms, rock drills and drilling equipment.

- 1. Pumps a b c d
- 2. Hydraulic manifolds a b c d
- 3. Cartridge valves a b c d
- 4. Directional control valves a b c d
- 5. Motors a b c d
- 6. Filters a b c d
